

WE LOVE YOUR LAND!

*We can help you explore ways
to protect it for future
generations.*

CONSERVATION EASEMENTS...

...are permanent, flexible, and can
provide tax benefits.

They do not require public access
and are monitored annually to
ensure protection.

*A conservation easement is a voluntary legal
agreement used to conserve and protect private
land. Our land trust has almost 2,000 acres
under conservation easements in the Jefferson
County area. We are nationally accredited with
twenty years of conservation experience.*

*If you are interested in using a
conservation easement to protect
your land, please reach out to us.*
